Certif-Eye - Fuel Excise Tax Recovery

Innovative solutions to help you simplify fleet Fuel Excise Tax filing, reporting, and recovery.

The Challenges

Submitting Form 720 Quarterly Federal Excise Tax Returns can be confusing and cumbersome. These complicated, multi-page forms require precision and diligence to complete correctly, requiring costly professional services that impact your bottom line.

Excise Fuel Tax is added to the cost of fuel by the Federal government, and is used to fund public infrastructure projects. What if you don't use public infrastructure? Should you be forced to pay these costly taxes on your fleet when they are on your or your customers' land?

Depending on the state the answer is most likely NO, which is where 3rd Eye® Digital steps in to help.

The Solution

Excise Fuel Tax Recovery, powered by Certif-Eye®, allows you to quickly calculate asset fuel utilization, providing the most accurate information when submitting Federal fuel tax-recovery filings. Captured in near real time with long-term storage options available, you can easily document and track fuel usage, fuel type, and odometer readings, categorized by public or private land utilization. This allows for quick and accurate identification of non-taxable fuel use reporting, which is often eligible for excise tax recovery.

For refuse fleets, when utilized in conjunction with Connected Collections, fuel utilization can be captured from the body through the Heil® body network. Regardless of your industry or where you are, fuel used to power required vehicle off-road functions have numerous options for recovery.

This simple solution even helps passively collect information that may be needed for a complex study, depending on your state. We will work to partner with you to ensure information that can help you make better decisions, faster.

Value Overview

- Quick and easy-to-use automated collection
- Connected Collections body fuel utilization
- Simplifies and increases accuracy of Excise Fuel Tax Recovery filing processes
- Allows partners to connect with taxation experts
- Understand the percentage and total fuel used on public versus private land
- Ensures detailed, accurate information for backup in case of DOT Audit
