

Quickly and easily identify the location, use, current capacity, and operating performance of your **STATIONARY EQUIPMENT.**

You handle the front of your store. We've got the back.

## Digitally Connected Technology

Innovative solutions for the management of stationary compaction and recycling equipment.

### The Challenges

Compactors and balers are excellent solutions for optimizing the flow of waste or recycled materials. However, like any equipment purchase, effectively managing these stationary units poses a unique set of challenges.

Knowing exactly where they are located, how they are used, if they are at or near capacity, and whether they are properly maintained is a logistical challenge for everyone. Whether you're running a chain of department stores, managing a rental service, or operating as a waste hauler, deploying an asset in the field can turn it into a black box. If not managed effectively, it can lead to significant additional costs or equipment downtime.

There is where 3rd Eye steps in with our newest solution for Digital Stationary compaction and recycling equipment!

### The Solution

With our digitally connected equipment suite, we simplify the management of your stationary assets, offering an easy-to-use platform where all your devices are consolidated in one location.

With just a click of a button, you can instantly pinpoint the location of your compactors and balers, determine how they are being used, and assess if they are operating as expected!

3rd Eye's digital equipment technology eliminates the 'wait and see' approach, enabling you to continuously monitor each asset's details and plan your services accordingly.

With fullness monitoring and bale weight tracking, 3rd Eye's digital equipment solution portfolio makes management easier and more efficient, ensuring you always get the best value from every piece of stationary equipment.

### Value Overview

- Sustainability
- Precise asset tracking
- Optimized service scheduling
- Improved maintenance planning
- Communicated asset utilization

### Designed For

BOX STORES
