Trash Commander TANK

MARATHON®

2 and 3 Cubic-Yard Stationary Compactors

- Compact design and superior construction
- Signature-series warranty
- Ideal for dock applications
- Two crossed-cylinders produce powerful compaction
- Ideal for chute applications or where space is limited

The Worldwide Compaction Leader

Marathon® Equipment is known throughout the world as one of the leading manufacturers of quality on-site waste compaction products. The RamJet® brand has been the industry standard for quality and innovation for more than 50 years, and includes stationary and self-contained compactors, compaction containers, apartment and high-rise compactors, pre-crushers, auger-style compactors, transfer systems, and a wide array of options for virtually any application.

Trash Commander TANK Compactor

Overview

Perfect for:

Distribution Centers

Malls

Warehouses

Office Complexes

Apartment Complexes

Drug Stores

Discount Stores

Shopping Centers

Why Marathon Equipment Is the Preferred Choice

The Marathon® Trash Commander® TANK® Series compactors are short, yet powerful. Available in two capacities, the compact size of the TANK Compactor makes it ideal for dock applications. It takes up to 35% less space than other compactors of similar capacity, and the two crossed-cylinders produce powerful compaction, equal to larger-body compactors. Each model is available in two compaction forces with 10 hp or 15 hp power units.

All Marathon components are selected for longevity and minimum maintenance, with special attention given to the selection of high-duty cycle components. Stress engineering provides the optimum degree of structural integrity. Only the best materials are used, and the highest standards of quality are observed in the manufacturing process.

Use the Trash Commander TANK for weekly volumes of more than 100 cubic yards of uncompacted dry waste materials. Select a model based on the "feed (clear-top) opening" that will accommodate the largest items being processed in your application.

Size Makes A Difference

Where space is limited, the shorter length of the Trash Commander TANK means the container length and capacity can be maximized. Its

compact length enables it to fit snugly against any structure, perfect for tight areas. The compact size and 48" loading height eliminate the need for platforms, hand and toe rails, and tread-plate tops in many applications.

Trash Commander TANK Series Compactor

Overview

TC-220T AND TC-300T TANK Stationary Compactors

The TC-300T is the latest in the Trash Commander TANK series of short, yet powerful stationary compactors. With crossed-cylinder technology, it is the most exciting development in the waste compaction industry. The three cubic-yard capacity compaction chamber is incorporated into a body that is only 9' 4 $\frac{1}{2}$ " long. This enables greater throughput capacity in applications where space is limited, such as retail outlets, department stores, malls, large restaurants, grocery stores, and shopping centers. The large clear-top opening accommodates large bulky items and delivers greater throughput capacity. The TC-300T TANK is ideal for dock-feed applications. With our standard four-sided, rear-feed hopper, there is no need for special walk-on tops or guard rails in many applications. A three-yard compactor that can fit into the space of a conventional two-yard unit.

The compact but powerful TC-220T was designed based on user suggestions. The TANK compactor maneuvers well in those applications where space is limited but demand for maximum compaction performance is not.

Trash Commander TANK Features

- ▼ The remote power unit has the Marathon Cycon Life-Xtender® cyclic control system, which eliminates the need for limit switches, produces superior payloads, and reduces trash-removal cost.
- ▼ A tough heavy-duty power frame includes a 1/2" thick compaction chamber floor and ram-face plate, and liberal use of heavy hot-rolled channels, angles, and bars. The breaker bar is a 6" x 8" x 1" thick solid piece of hot-rolled angle steel.
- ▼ The TC-300T is the shortest three cubic-yard compactor in the industry.
- ▼ Superior clear-top openings in a small footprint.

Perfect for Tipper System Applications

The Trash Commander TANK is the perfect choice for applications requiring a tipper system. Bags of waste are put directly onto the tipper and dumped into the compactor. The Stationary compactor effectively solves spillage and leakage problems associated with conventional stationary compactors and containers.

Some applications require a high degree of security and sanitation. The Trash Commander TANK provides both. Waste is safely stored out of reach of scavengers. Sanitary conditions are enhanced even further with the optional Marathon® Ozone Odor-Control System, which destroys odor-producing bacteria by molecular reaction.

Available with Bayne Thinline Cart Lifter

If equipped with an optional integral cart lifter, the Trash Commander TANK offers an economical and safety conscious solution for a wide variety of waste material handling applications.

Bayne® Thinline® cart lifters work with standard twobar roll-out carts and can lift up to 750 lbs. The lifter has a powder-coated finish so it can stand up to the elements and be easily cleaned.

Trash Commander TANK Series Compactor

Features

Remote Power Pack

Separate from the compactor/container, the Marathon Remote Power Pack remains free of damage caused while hauling to and from disposal sites, and stays free of problems caused by landfill dust. There are no electrical connections to make or break, and two simple-to-use, hydraulic quick disconnects couple the power unit to the packing head. All Marathon Remote Power Packs are built in-house to our quality standards, and each unit must pass a series of stringent tests before it can be shipped with the selected compactor.

Optional Doghouse

An optional doghouse offers a totally enclosed charge box with heavy-duty latches.

Cycon Life-Xtender Cyclic Control System

Standard on all Marathon Trash Commander TANK Compactors

- Reliable PLC controls eliminates the need for limit switches
- The Cycon Life-Xtender noshock cycle control extends cylinder and hose wear life
- Automatic "container-full assurance system" the ram dwells against the load at full pressure, resulting in better compaction
- Smoother running, quieter operation
- Advanced hydraulic design enables the system to operate at minimum pressure levels until the need for more pressure is automatically sensed.
- More accurate Advanced Warning or Container-Full options
- Superior cold-weather performance

TC-220T and TC-300T TANK

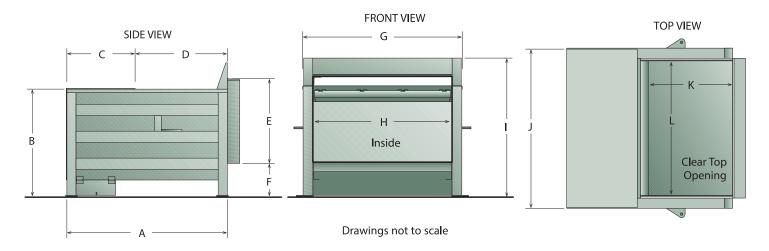

Dimensions & Specifications

Compact Size. Big Performance.

The TC-300T TANK (foreground) compared to a standard Marathon 3 cubic-yd. compactor shows the difference in overall length — yet the clear-top opening of the TANK compactor is the same as the larger RJ-325. The picture also illustrates that if the TANK compactor is fitted with our standard four-sided, rear-feed hopper, there is no need for tread plates or guard rails in many applications.

MARATHON WARRANTY

The best coverage in the business

Marathon® Equipment is pleased to announce the release of our updated Warranty Coverage program. This warranty will take effect and be applicable on all products sold on or after June 1st, 2021. Note that this warranty plan is not retroactive to products sold prior to June 1st, 2021.

3 Yr. Structural, 2 Yr. Parts, 1 Yr. Labor Marathon Compaction Solutions Warranty

Our existing Signature Series Warranty, Compactor Warranty, and Auger Warranties have been combined into a new Compaction Solutions Warranty. The Compaction Solutions Warranty includes **3-years structural** warranty, **2-years part warranty**, and **1-year labor warranty**.
